 Everything you need to succeed is right here, ready to go?! 

Channel Name

Prompt:

Give me a list of 10 original, creative, and catchy YouTube channel name ideas for a channel in the baby podcast niche. The channel features funny, meme worthy, and viral style podcast clips where babies appear to be having conversations like adults.

Channel Description

Prompt:

Write a fun, engaging YouTube channel description for a baby podcast channel named [CHANNEL NAME]. The channel features funny and viral clips of babies having adult like podcast conversations. Make it playful, catchy, and easy to read.

Channel Logo

Prompt:

Create a detailed text to image prompt for generating a logo for a baby podcast YouTube channel. The logo should be cute, modern, and playful, featuring elements like a baby, a microphone, and podcast related icons (like headphones or sound waves). Use bright, friendly colors and a simple, clean design suitable for digital use. Describe the style as fun and approachable, appealing to a wide audience. Make sure the prompt is clear and detailed enough for an AI image generator to create a unique and recognizable logo.

Video Script

Prompt:

Write a short podcast script that lasts 1 minute. It features two male characters named "Character 1" and "Character 2" having a very natural, funny, and slightly controversial conversation. Make the dialogue sound real, like two friends joking around, interrupting each other, and riffing on a hilarious or weird topic. The topic should be attention grabbing and feel like something that could easily go viral, relatable, memeable, and absurd but not offensive. Avoid big or complex words. Make the jokes clever but casual, not over polished. Include a funny twist or punchline. Don't add stage directions or timestamps. Just write the back and forth conversation. Make it flow like a real podcast with authentic rhythm, banter, and personality.

Character Label Removal

Prompt:

Remove all character labels like "Character 1:" and "Character 2:" from the following podcast script.

Baby Images

Prompt:

Create 2 separate text to image prompts for generating photorealistic images using an AI image model (like Midjourney or DALL·E).

Each prompt must describe a single baby shown waist up, sitting in a cozy podcast studio chair with a professional podcast microphone in front of them. The framing must be close up, not distant.

Use the exact same wording to describe the background, lighting, and podcast setup in both prompts. This includes: the room, chair, microphone, lighting, wall details, and atmosphere. The goal is to make both babies appear in the exact same studio environment, only changing the baby's features and outfit.

Prompt 1: The baby is wearing a miniature formal suit, looking curious and confident.

Prompt 2: The baby is wearing a colorful graphic t-shirt, looking relaxed and playful.

Structure the output like this:

Prompt 1:

[Full detailed image description here]

Prompt 2:

[Use identical background and setting description, change only the baby's clothing and expression]

Use clear, natural, photorealistic language. Do not reference "same background", actually repeat the background description word for word.

Video Title Ideas

Prompt:

Based on the script above, create 5 click baity YouTube Shorts title ideas that are highly engaging, attention grabbing, and optimized for virality. Keep them under 60 characters if possible, and make sure they spark curiosity or emotion related to the video content.

Video Hashtags

Prompt:

Give me a list of the most viral and SEO optimized hashtags that I can include in my YouTube Short titled "[VIDEO TITLE]". The Short is in the baby podcast niche. The hashtags should be relevant, trending where possible, and optimized for YouTube's algorithm to increase reach and discoverability. Include a mix of broad and niche specific hashtags. Limit to 15 hashtags max.

“Money Degree”

Success on YouTube isn't about showing your face, it's about showing your creativity. Keep posting, keep improving, and your audience will find you.
